# Transit Rail Association for Canadian Contractors, Operators, Maintainers and Standards

TRACCS is a Non-Profit Association of contractors, operators and maintainers in rail, OCS, signal construction, and communication system coming together to serve the needs of its members and the industry.

**Our Mission**

**Our mission is to stabilize cost and ensure adequate and qualified resources to perform the work safely and efficiently.**

**The Pillars of Our Work**

- SAFETY**
- SUSTAINABILITY**
- INNOVATION**
- GROWTH**
- COST-EFFICIENCY**
- NATIONAL STANDARDS**

What we do

# Webinars, Workshops and More

We are working continuously to develop a collaborative platform to discuss industry best practices and lessons learned, and any developments in Safety, Innovation, Sustainability and Cost-Efficiency.

[#TheConversationsThatNeedToHappen](#) - [#WebinarWednesday](#)

Our newest project is the

## Canadian Transit Rail Standards Development Program.

The Canadian Transit Rail Standards Development Program is aimed to promote the creation of national standards to build, operate and maintain Rail/Transit Systems across Canada.

TRACCS Transit and Rail is proud to announce its collaboration with **CSA Group (Canadian Standards Association)** to develop practical passenger rail standards.

These standards for the Canadian environment will provide clear guidance on engineering specifications, safety management in operational railway environments, and competency requirements for passenger rail work. Our goal is to enhance safety, improve constructability, reduce costs, and ensure project timelines are met.

As part of this collaboration with CSA Group, we are working on a strategy to establish a timeline for the development of these standards and associated documents. We will prioritize the most critical documents to be produced first, ensuring that the most important issues are addressed efficiently and implemented in a timely manner.

We are calling on all members to actively participate in upcoming workshops focused on Mechanical & Electrical (M&E), Competency, Engineering, Signalling, Rolling Stock, and Safety. These workshops will commence over the coming months, and we encourage everyone to get involved. Don't sit on the sidelines as your input is crucial to shaping the future of the rail industry in Canada.

Stay tuned for more details on how to participate!

# Key Highlights 2025

**Experience firsthand the latest advancements in all areas of our industry.**

- **Technology Showcase:** A curated sector dedicated to technology developments, where new exciting digital products for Transit Rail will be presented to the audience. On its second year, larger and even better.
- **Conference:** Engaging sessions featuring leading experts from both the public and private sectors will delve into the future of transit rail technology, addressing the most critical and urgent issues.
- **Networking Opportunities:** Engage with industry leaders, professionals, and experts. Make the most of these networking chances to build collaborations and partnerships. Enjoy social areas, cocktail spaces, meeting rooms, and more—all conveniently located in one venue.
- **Live Product Demonstrations** of cutting-edge machinery and technology at our Technology Showcase and Outdoor Sector, where exhibitors will be on hand to offer detailed insights into the features and advantages of their solutions.
- **Returning Features:** Indoor/Outdoor, Cocktail, Meeting Booths, Two days.

## New Features:

**Roundhouse  
&  
Equipment demos on tracks**

# Roundhouse

## New Networking Space

The Roundhouse is a space to recover from the walking and talking. Have a seat on the couches, play some games and take some pictures. The Cocktail will be hosted here, too.

Contact our team if you wish to support this central area.

# Demos on TRACK

Because there is no better way to see the equipment we need to use to build and maintain passenger rail than watching it performing its duties on the track itself.

Outdoor Booths this year can have a track section to demonstrate their equipment's capabilities and newest features.

Contact our team if you want your equipment on track!
